

**TOUCHSCREEN INSTALLATION IN
PARTNERSHIP WITH VIEWSONIC**

Ashford School

The Brief

Ashford School – Touchscreen Installation; Ashford School were looking to upgrade the technology in their classrooms through the use of Audio Visual products. The school classrooms were set out in the standard style with interactive whiteboards connected up to fixed desktops. The teachers wanted to create a more interactive teaching experience for their students and connected to an easy to use template.

The Solution

NCS worked alongside Viewsonic to install multitouch, interactive Viewboards connected to 27inch teacher display panels. The Viewboard is an interactive digital whiteboard that not only connects to the teacher's display but also onto the students' tablets.

This system has meant that students can now experience engaging and interactive lessons.

Benefits

- ✓ **The large 27-inch teacher display can be reflected on the Viewboard and on student tablets.**
- ✓ **Easy, simple to use system that provides teachers with the opportunity to move pages around, switch between displays and manipulate images.**
- ✓ **Zoom functionality enables greater focus and improved visibility.**
- ✓ **Improved student interaction.**
- ✓ **Teacher display can be moved and directed around the room**

Why choose NCS Technology? NCS Technology are experts in audio visual technology and have decades of experience within the education sector. We work alongside Viewsonic to ensure the best possible classroom solutions for the best value. Our costs are realistic and sustainable with no hidden extras.
