

ROYAL BOROUGH OF GREENWICH

# Blackheath Library

## The Brief

Blackheath Library is a busy, one level, building in the heart of a busy community. There were a number of lighting issues which were causing significant problems for staff and visitors.

Light levels were too low, making it difficult for some users to access the resources that the library had to offer. Additionally, there had been numerous maintenance callouts for the fluorescent tube fittings, which were dated and had brittle internal wires. As a result, there were numerous different fittings and fluorescent tubes installed throughout the building.

## The Solution

NCS Technology designed and carried out a bespoke retro-fit LED lighting solution for all areas of the library. Working with staff, we were able to identify key places where improved lighting was important for visitors.

Our works included installing energy-efficient LED light fittings and a full test and commission of the new system.

## Benefits

- ✓ **Installing LED light fittings has created savings on energy consumption and maintenance costs**
- ✓ **Since the works were carried out there have been no complaints about light quality**
- ✓ **There have been no callouts since the system was installed and commissioned**
- ✓ **By improving the quality of the lighting, the library now looks more welcoming. This has been reflected in increased footfall.**
- ✓ **The light fittings are now uniform throughout the building**
- ✓ **Ongoing maintenance costs have been significantly reduced, meaning budgeted maintenance money can be spent elsewhere.**

*How would you describe the service provided by NCS Technology? Very good*

*How likely are you to recommend our solution and services? Very likely*
