

LED LIGHTING INSTALLATION

CAF Ceramics and Porcelain Tiles

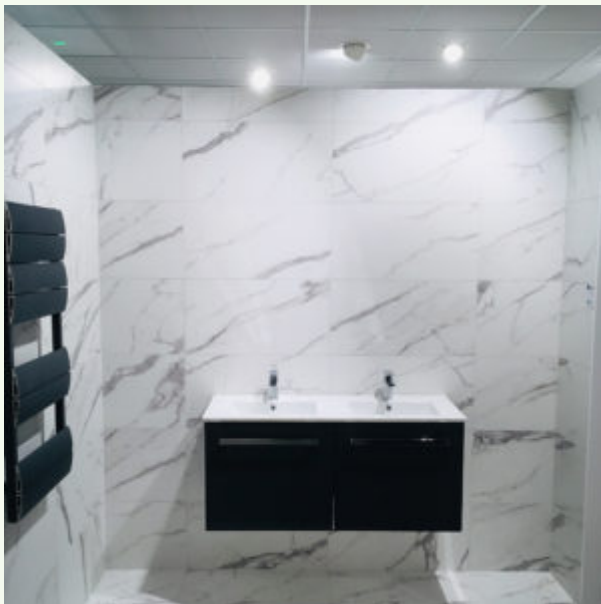

The Brief

CAF Ceramic and Porcelain Tiles are an established independent retail tile showroom, with expertise in importing Italian porcelain tiles. Having recently moved to a brand new, bespoke showroom they felt the original fit-out lighting installation was not providing the quality of light they were looking for to display their extensive range of tiles in the way they deserved.

CAF Ceramic and Porcelain Tile needed specialist lighting to enhance their tile displays.

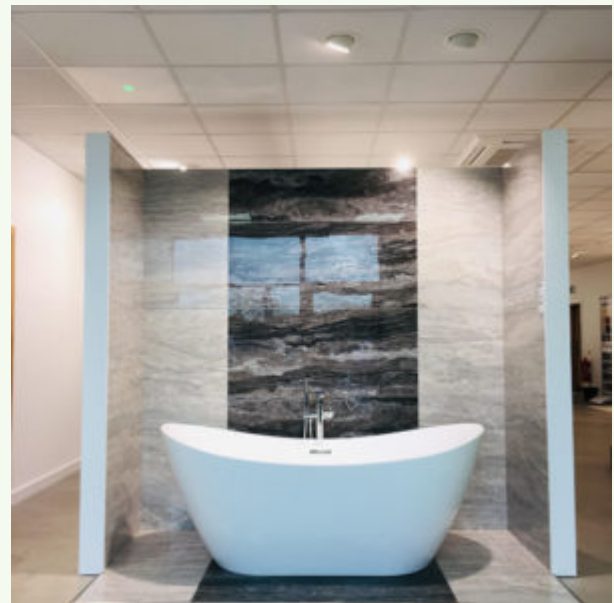

The Solution

NCS Technology in conjunction with Imoon lighting solutions were able to supply and install Venere Pro 1 Spark recessed lighting.

Benefits

The new lighting installation has provided outstanding lighting in our tile showroom, the colour of the displays tiles are now standing out rather than blending in with their surroundings.

i

"NCS Technology found the perfect lighting solution by teaming up with Ron from imoon, they provided an excellent service and I am extremely likely to recommend them to others. I could not be more delighted that an Italian light is being used in my showroom displaying Italian tiles."

NCS Technology work with a range of lighting providers to ensure that the right product is installed to provide the best possible solutions. Get in touch with us on info@ncstechnology.co.uk or 01622 769692 for a no-obligation site visit and quotation.
