

CLEVERTOUCH

CLEVERTOUCH PLUS

Eastbury Primary School

The Brief

NCS Technology were chosen by Eastbury Primary School, Essex, to supply and install 16 Clevertouch screens. NCS Technology has worked with Eastbury for many years, and the school had always been pleased with the high service and quality of work provided by NCS. The school wanted a touchscreen in every classroom to enhance the learning opportunities for its pupils.

The Solution

NCS technology supplied and installed 16 65 Clevertouch Plus LED interactive screens, which were fixed with heavy duty wall brackets. NCS Technology installed the cable kits, which included HDMI, USB, audio and VGA connectivity, with a faceplate for easy connection at the location of the teacher's desk in each classroom.

Benefits

The Clevertouch Plus (Interactive Whiteboard) enables teachers to seamlessly bring lessons and subjects to life. At the touch of a button, teachers can access their computer screen, visualizer and Apple TV. In comparison to interactive whiteboards, the Clevertouch Plus provides **sharp, clear and bright images, lower maintenance costs and total cost of ownership, and a better touchscreen experience.**

"The Clevertouch screens are a lot clearer than a projector and so much more interactive and engaging for our children." Mark Leporati
