

IP CCTV & STRUCTURED CABLING INSTALLATION

FM Conway

The Brief

FM Conway delivers the infrastructure services to support, develop and maintain the UK's vital transport networks, built environment and open spaces.

They had multiple ageing CCTV systems in place, all accessed by different applications and very difficult to manage. Some systems were accessible remotely, some standalone, and there was no remote access; all had varying picture quality.

FM Conway needed an IP CCTV installation that could cover multiple geographically dispersed sites and that could be monitored both onsite and from a central location in a user-friendly, secure and efficient manner.

The Solution

FM Conway has previously worked with NCS Technology to install structured cabling, AV and NCST Technician Service.

Once FM Conway knew NCS Technology were approved Avigilon installers it made sense for an existing, well trusted and established partner to assist where other IP CCTV services were required; NCS Technology was chosen due to competitive pricing, good knowledge of available products on the market as well as being a well-established and trusted partner; NCS Technology was able to deliver an End-to-End solution aided with knowledge learnt about our network setup from NCS Technology technician service. 8 X Avigilon HD Video appliances with 87 Cameras at the present time.

Benefits

FM Conway now has one application and can access 87 cameras across 8 sites from one login screen. The IP CCTV systems are now maintained and upgraded by one company which means much it is much easier for them to manage and saves a lot of time.

Their IP CCTV systems are no longer isolated, standalone devices and are now integrated into their WAN and the corporate network. Systems are easily accessible remotely from their head office from a single application and login.

FM Conway find the new system much easier to use and the picture quality is a vast improvement over previous systems, they plan to roll out the system to other sites

"Exceptional work standard, friendly engineers Very likely, often do recommend NCS Technology to others. We will continue to expand our fleet of Avigilon CCTV systems and are looking into the NCS Technology CCTV Maintenance contract for support and systems maintenance."

Matthew Chapman, IT Supervisor – Infrastructure - FM Conway

NCS Technology have extensive experience installing IP CCTV in a range of environments, get in touch for a no-obligation discussion regarding your site security needs on info@ncstechnology.co.uk and 01622 769692.
