

LED LIGHTING AND ELECTRICAL

Holy Family Catholic School LED Lighting

Holy Family Catholic School LED Lighting

The Brief

The Holy Family Catholic School LED Lighting Installation Project; The Holy Family Catholic School are a two-site secondary school with over 1200 students and 180 staff; Some of the buildings are over 200 years old with high ceilings, which presented additional challenges for installing LED Lighting.

The challenge was to improve both the pupil experience by increasing light levels and making the old buildings as energy-efficient as possible whilst saving money.

The Solution

Replacement of current lighting with an energy-efficient LED lighting solution.

Benefits

The benefits of the installation have exceeded expectations, the school environment is much brighter throughout; This was a long term investment for the school and they are monitoring energy bill reductions.

"Excellent and professional throughout, most definitely recommend the solution provided and services of NCS Technology. Keep up the good work!"

Tony Cramer - School Business Director

NCS Technology has extensive experience in installing energy efficient LED Lighting in educational environments.
