

MANAGED IT SERVICES

Hunton Primary School

The Brief

IT Project for Hunton Primary School; Hunton CEP is a small village school in Kent with under 100 pupils on roll; We have partnered with NCS Technology in respect of IT Services for almost 3 years. Our latest IT Project challenge was renewing the teachers' current laptops.

Hunton Primary School had a set of laptops for teachers and support staff and these were running slow and therefore not as efficient or effective within the teaching environment; NCS Technology was chosen to implement solutions for the IT Project for Hunton Primary School

i

i

The Solution

Instead of replacing the set of laptops en masse, our IT Technician engineer Ben sourced SSD hard drives to replace current hard drives to make the existing laptops run more efficiently.

Benefits

This solution has allowed for the laptops to run quicker whilst not having the financial outlay to replace all hardware.

"The service Ben provides feels bespoke, he feels like a member of the team despite only being onsite once a month. Having said that he is only an email or phone call away and responds diligently to anything that is flagged up."

Stewart Murdoch - Head Teacher

NCS Technology works with a range of schools and education providers. From retrofitting energy-efficient LED lighting, Audio visual and touch screen solutions through to IT Technician services. Get in touch for a no-obligation site visit and quotation on info@ncstechnology.co.uk or 01622 769692
