

CCTV INSTALLATION

Laleham Gap School

The Brief

Laleham Gap, Kent's specialist school for children with speech, language and communication difficulties, selected NCS Technology to install a CCTV system in their brand new purpose built school. Internal CCTV was not part of the original building project and the school required a robust and reliable system with easy access to high quality recordings.

The Solution

NCS Technology worked closely with the Network Manager to design a solution that met the school's CCTV needs. Samsung cameras were installed, using Milestone XProtect as the Video Management Solution (VMS), and a HP solution was implemented to store the footage.

Benefits

"Milestone has proven easy to setup on multiple workstations and has been easy to use. We can view the footage and export when necessary."

"Our internal CCTV has been used on multiple occasions to help protect staff and pupils in the school. Everyone in the school is aware that should an incident occur there is a high likelihood of it being recorded and acted upon which is reassuring for staff."

– Jon Shaw, Laleham Gap

"I am very pleased with the outcome of our project. From start to finish NCS have been nothing short of outstanding, they successfully planned and executed the work and helped us to overcome some very tricky obstacles that I think would have stopped a lesser company from completion. NCS have provided excellent aftersales support and I would not hesitate to use NCS for further projects within our school and have recommended them to other schools."

Jon Shaw - Network Manager, Laleham Gap

NCS Technology offers a range of Security Solutions suitable for use in an educational setting, from access control through to IP CCTV. Get in touch on **01622 769692 or email **info@ncstechnology.co.uk** to discuss your projects.**
