LED LIGHTING INSTALLATION

Royal Borough of Greenwich Eltham Crematorium Offices

The Brief

Royal Borough of Greenwich Eltham Crematorium Offices LED Lighting Installation; The lighting at the offices at Eltham Crematorium needed replacing.

The old fluorescent fittings, combined with low ceiling heights were giving staff members and visitors headaches; The project brief from Eltham Crematorium required contractors to carry out tests on all the lighting circuits, replace the existing fluorescent fittings with LED light fittings & to test & provide light level results upon project completion.

The Solution

NCS Technology designed and carried out a bespoke retrofit LED lighting solution throughout the main office area and also completed full lighting tests before commission.

Benefits

- ✓ **Savings on energy consumption and maintenance costs.**
- ✓ **An easier working environment**
- ✓ **Energy consumption meter**
- ✓ **There have been no complaints or call-outs since NCS Technology carried out the works**
- ✓ **Staff and visitors are happier and the offices appear more welcoming**

The lifespan of the LED fittings means that future maintenance costs have been significantly reduced.
